

**If you don't know your ring size at all, don't worry.
We've got you covered.**

Use one of the following two methods to find it out.

Method 1

1. Take a string (that doesn't stretch) or a piece of paper.
2. Wrap it around the widest part of the finger where you would like to wear the ring.
3. Mark the part of the string/paper that overlaps with the end.
4. Take a ruler and measure the length of the string/paper. This measurement (in millimetres/inches) is the inside circumference of your ring.
5. Use the ring size guide to find your ring size.

*Please be careful to wrap the string/paper perpendicularly to your finger and not diagonally as this would result in a bigger measurement.

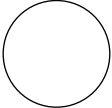

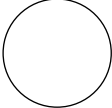

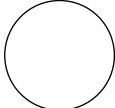

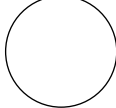

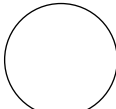

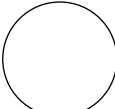

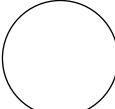

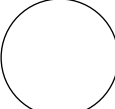

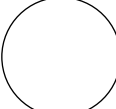

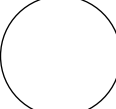

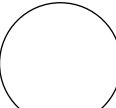

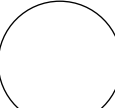

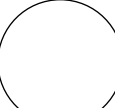

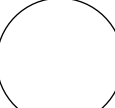

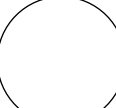

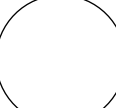

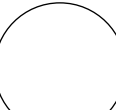

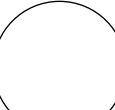

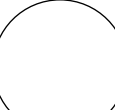

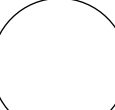

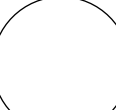

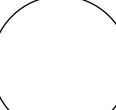

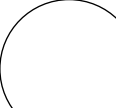

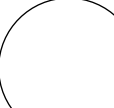

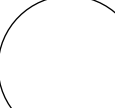

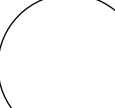

Method 2

1. Print the ring size chart below at a 100% scale or no scale.
2. Take a ring of yours that fits the same finger where you would like to wear the ring.
3. Place the ring on top of the circle that fits best. The inside of the ring has to fit on the circumference of the circle.
4. Read the measurement inside the circle. This measurement (in millimetres/inches) is the inside circumference of your ring.
5. Convert to the appropriate system using the ring size guide.
